Importance: High

Good news. The re-migrations are completed for the NPL sites. As Madhu notes below, the

exception reports will soon follow. From what I've seen of other regions' exceptions so far these are mostly items agreed to not be included in SEMS such as User Defined Actions and null values in some fields where there probably should be dates. I will forward as soon as I receive them. Steve

Steve,
NPL Site re-migration is complete for all Regions.

We are looking into exceptions on Region02 NON NPL Sites.

I will send you the migration report for Regions 5, 3, 2, and 6 soon.

Thanks
Madhu
